“CLICK THRU” MATHS DAYS

- “Click Thru” is a series of eight, Year 6 interactive presentations, each one designed to be delivered over a full day by the class teacher during the course of Year 6.
- Produced specifically for the new National Curriculum, aimed at moving Year 6 pupils to National Standard and beyond in KS2 SATs.
- This is a unique, innovative way to tick many Ofsted boxes, adapting the Year 6 syllabus to include maths days which review and enhance key knowledge and skills areas, through presentation, interaction, collaboration, competition and practice.

Schools are constantly looking for different ways to deliver maths that will improve results and impress Ofsted. “Click Thru” is unique because it incorporates maths days into the Year 6 curriculum. These maths days are specifically designed to be easy for the class teacher to deliver with the minimum of preparation. Each Click Thru Maths Day uses the most effective delivery methods, but minimises the huge burden of preparation for the teacher. They are easy for the class teacher to deliver, because all they have to do is just click through the presentation and add their own exposition as they go along.

Key areas of the new National Curriculum are delivered and reinforced in a clear, enjoyable and dynamic way which will ensure both progress and fun over each presentation.

All maths days consist of three sections.

Section 1: An interactive presentation of knowledge and skills.

Section 2: Practical and fun reinforcement activities to back up knowledge and skills learned.

Section 3: Knowledge and skills applied to SATS questions.

Click Thru Maths Days are most effective when delivered monthly through the course of Year 6, but can be delivered over a much shorter time frame. They are also very effective used as Saturday or holiday schools.

Sessions are ideally suited to groups of up to 30 pupils.

An annual licence for the full series of eight Click Thru Maths Day presentations can be purchased for £230 for the first year and then £200 per year for each subsequent year. This licence entitles the purchasing school to use of the presentations for one year from the date of purchase, in accordance with “Conditions of Use” and copyright regulations. (Registered with UK Copyright Service. Reg. No.: 284700675)

For further information or to purchase a licence, contact Neil Barber by email or phone.
